Advanced search Help Tips

Formatting your query:

To search for an entire **phrase** you can use quotation marks. For example, typing "private equity" will return results that contain that whole phrase.

To **include terms** in your search results you can use the + operator with no space between it and the search term it relates to. For example, typing +private +equity will include only results that include both words private and equity.

To **exclude terms** from your search results use the - operator with no space between it and the search term it relates to. For example, +private -equity will include results that include private, but exclude equity.
